SUMMARY

Information & Communication Engineering (ICE) undergraduate student at Bangladesh University of Professionals (BUP). Experienced in full-stack web development, relational database systems (MySQL, JDBC), and object-oriented programming (Java, Python). Strong interest in data-driven problem solving, cloud technologies, and telecommunications. Seeking an entry-level software engineering or technical internship.

EDUCATION

Bachelor of Science in Information & Communication Engineering (ICE)

Bangladesh University of Professionals (BUP) | Dhaka, Bangladesh
Expected Graduation: 2027

Core Coursework:

Data Communication & Networking | Database Management Systems | Data Structures & Algorithms | Object-Oriented Programming | Signals & Systems | Digital Signal Processing, | Software & Requirement Engineering .

TECHNICAL SKILLS

- Languages: Java, Python, C/C++, SQL, JavaScript (ES6+), HTML5/CSS3
- Web & Frameworks: Servlets, JSP, JDBC, Bootstrap 5, Java Swing, Firebase
- Databases & Tools: MySQL, Git, GitHub, VS Code, Apache Tomcat, Cisco Packet Tracer, MATLAB
- Core Domains: Data Communication, Software Architecture, Network Protocols (TCP/IP), Database Design

KEY PROJECTS

AI-Based Full-Stack E-Commerce Platform

- Designing and building a modern e-commerce platform integrated with Google Cloud Technologies and Firebase for data storage and smart recommendation features.

Courier Tracking & Delivery Management System (CourierPro)

Java, JSP, Servlets, MySQL

- Engineered a role-based delivery management system featuring custom dashboards for Admins, Employees, and Customers.

- Implemented SQL queries and relational database schemas to manage shipment status updates and transactional analytics.
- Handled request-response pipelines and session management using Servlets and JSP.

Smart Office Management System

Java, Java Swing, JDBC, MySQL

- Developed a desktop application featuring employee management and asset tracking modules.
- Designed an intuitive GUI with Java Swing integrated with MySQL database via JDBC for persistent storage.

Smart Home Dashboard Simulation

Java, Java Swing

- Created an interactive device control panel simulation featuring a PIN security unlock mechanism and system state management.
